

# ROCKFORD SYSTEMS' LOCKOUT/TAGOUT

Experienced. Trusted. Committed.

## CHOOSE SAFETY EXCELLENCE WITH ROCKFORD SYSTEMS

When it comes to Lockout/Tagout (LOTO) solutions, the choice is clear – Rockford Systems, LLC. Here's why we are the preferred partner for organizations in the safety industry:

### TRUSTED INDUSTRY LEADER

Rockford Systems has long been revered as a trusted industry leader in the realm of machine safeguarding. This extensive experience and reputation have positioned us perfectly to excel in the field of Lockout/Tagout. Our journey in machine safeguarding has given us a unique competitive advantage – an in-depth knowledge of industrial machinery. This expertise sets us apart and empowers us to assist organizations in navigating the complexities of working safely with industrial equipment.

### THE SYNERGY OF MACHINE SAFEGUARDING AND LOTO

Machine safeguarding and Lockout/Tagout are intricately linked facets of workplace safety. Our profound understanding of machine safeguarding naturally extends to LOTO, creating a synergy that benefits our customers. We recognize that the two are not separate entities but integral parts of a comprehensive safety strategy.

### OUR COMPREHENSIVE APPROACH

At Rockford Systems, we don't just identify problems – we provide holistic solutions that ensure lasting safety improvements. Our services are designed to build robust safety frameworks that stand strong over time.

Choose safety excellence with Rockford Systems: Elevate your safety standards, mitigate risk, and foster a culture of safety excellence by choosing Rockford Systems as your trusted Lockout/Tagout partner.

Workplace Safety Solutions

# Lockout/Tagout Services Overview

## Gap Analysis

Our Gap Analysis solution is a comprehensive evaluation model where our Rockford Systems Safety Professional conducts a comprehensive evaluation of your lockout/tagout program, in alignment with OSHA 1910.147 regulations. We assess your policies, program elements, application by authorized personnel, and workforce understanding. You'll receive a detailed report with actionable recommendations for improvement, including options for procedure development, program enhancement, and training.

## Machine-Specific Procedures

Efficiently create equipment-specific lockout procedures using Rockford Systems LOTO Software. Our service includes on-site audits, data gathering, procedure development, accuracy verification, and approval. Simplify field application and inspection tracking with our QR Code-enabled mobile app.

## Program Development

Rely on our Safety Consultants to develop a comprehensive written lockout/tagout program that complies with OSHA 1910.147 regulations and industry best practices. This service encompasses all essential processes, including Protective Material and Hardware, Training and Communication, Application of Control, Release from Lockout/Tagout, Device Removal, Testing or Positioning, Group Lockout, and Shift or Personnel Changes.

## Authorized Training

Engage your workforce with fully compliant Authorized Lockout/Tagout Training. Our program incorporates OSHA 1910.147 regulations and your specific requirements. It includes hands-on demonstrations, practice sessions, and group exercises. Collaborate with our Safety Consultant to tailor the training to your organization's unique program elements.

## Lockout/Tagout Workshop

Empower your team with a customized lockout/tagout workshop. This course covers OSHA 1910.147 regulations, your company policies/procedures, and industry best practices. Our instruction includes a comprehensive review of regulatory requirements, standard interpretations, and aspects of the ANSI z244.1 standard.
