

ROCKFORD SYSTEMS

Experienced. Trusted. Committed.

MACHINE SAFEGUARDING AND LOCKOUT/TAGOUT SAFETY SOLUTIONS

WHY ROCKFORD SYSTEMS?

Rockford Systems has extensive experience and reputation that has positioned us perfectly to excel in the field of both Lockout/Tagout and Machine Safeguarding with in-depth knowledge of industrial machinery. This expertise sets us apart and empowers us to assist organizations in navigating the complexities of working safely with industrial equipment.

HOW ROCKFORD SYSTEMS CAN HELP?

Rockford Systems stands committed to the prevention of injuries and fatalities in the workplace. We help businesses of all sizes address machine safeguarding challenges and remove the burden of managing risk reduction and machine safeguarding initiatives.

WHAT DIFFERENTIATES US?

Rockford Systems has the applications expertise to solve an organization's most complex machine safety and lockout/tagout challenges. Turnkey solutions from assessment, training, custom engineering, procedure creation, products, and installation have been trusted throughout the manufacturing industry for decades.

DELIVERING EXPERT SAFETY SOLUTIONS

Why Safeguard and Lockout/Tagout? Whether driven by the law, social responsibility, or the need for risk reduction, organizations want to make their workplaces safer. The business case for machine safeguarding and lockout/tagout is clear. Since 1971, manufacturers have depended upon Rockford Systems for customized industrial safety solutions to bring their operations into compliance with today's OSHA regulations and ANSI/NFPA standards to ensure risk reduction.

Workplace Safety Solutions

PARTNER WITH A SAFETY EXPERT

Rockford Systems, LLC is your trusted partner offering comprehensive machine safeguarding and lockout/tagout solutions. Our vast expertise, extensive range of services, and unwavering commitment to safety establish us as an invaluable resource for companies aspiring to create safer, more compliant work environments, all while reducing risk.

MACHINE SAFEGUARDING

Training and Education

For decades, Rockford Systems has been educating corporations about OSHA compliance, risk reduction, and machine safeguarding. Hundreds of participants attend our seminars each year, and come from a variety of areas to include government, manufacturing, distribution, aerospace, insurance and consulting.

Machine Risk Assessment

Our team identifies the tasks and associated hazards on machinery and scores the risk level using the ANSI B11.0-2020 safety regulation methods and will provide customers with a report.

Machine Safeguarding Assessment

Our team identifies the task and associated hazards on machinery and recommends safeguarding solutions based on existing OSHA standards and current ANSI/NFPA regulations. We provide customers with a detailed Machine Safeguarding Assessment and Proposal.

Customized, Engineered Integration Solutions

We offer simple to complex custom engineered and build-to-spec machine safeguarding solutions.

Over 10,000 Safeguarding Products

Machine safeguarding product solutions designed to reduce risk and improve worker safety. Our products include shields, guards, presence sensing devices, controls, disconnects, starters, covers and more.

Expert Installation Services

Our experienced installation teams safely integrate safeguarding products onto your machinery and train operators to properly use those safeguarding devices.

Technical and In-Field Support

Rockford Systems guarantees every purchase with a professional, highly-trained team of technical support advisors and in-field support is available for more complex troubleshooting and repairs.

Annual Validation Audit

Our inspections ensure that safeguarding products are in place as intended, working at optimal performance, and operators are using safeguarding solutions as designed and trained. We will deliver a peace of mind and report continued compliance with existing OSHA Regulations and current ANSI/NFPA standards.

LOCKOUT/TAGOUT

Gap Analysis

We provide a comprehensive gap analysis to ensure your company's full compliance with OSHA's 1910.147 regulation. Our tailored approach goes beyond surface-level evaluations, delving deep into your company policies, program elements, and workforce knowledge of the Lockout/Tagout (LOTO) program.

Machine-Specific Procedures

Our team understands the critical importance of precise LOTO procedures to ensure the safety of your workforce. Using our proprietary RS LOTO Software, we work closely with your company to conduct thorough assessments of each machine, meticulously identifying energy sources, potential hazards, and isolation points.

Program Development

We understand the paramount importance of ensuring workplace safety and compliance with OSHA standards. Our specialized team is dedicated to crafting tailored LOTO programs designed to meet your needs while ensuring compliance with OSHA 1910.147.

Authorized Training

Empower your workforce with Rockford Systems Authorized LOTO Training. Our concise and comprehensive training equips employees with the knowledge and skills to safely implement lockout/tagout procedures, minimizing workplace hazards.

Lockout/Tagout Workshop

Equip your team with vital LOTO knowledge for a safer, compliant, and thriving LOTO program. Expert instruction covers standards, regulations, and best practices in workplace safety. Through engaging activities and real-life scenarios, participants develop the skills to implement LOTO protocols effectively.

Cloud-Hosted RS LOTO Software

Simplified deployment, on-the-go procedure building, and configurability — Wi-Fi not needed. Scan, verify, and audit effortlessly for compliance. RS LOTO built by EHS professionals for EHS professionals with comprehensive historical data integration and notifications.
